

REMARKS

I. Status of the Claims

Claims 1, 47-49, 150, and 154-156 are currently pending. Claims 2-47, 50-149, 151-153, and 157-188 have been canceled herein without prejudice or disclaimer. Claims 1 and 150 have been amended herein. Support for the amendments to claims 1 and 150 can be found in the specification as originally filed. For the Examiner's convenience, Applicants point out in the following Table 1, the specific written description support in the specification for the elements of claims 1 and 150, as amended.

Table 1.

<u>Element</u>	<u>Support in Specification</u>
A structured cosmetic composition comprising:	See page 3, line 15
which is wax-free and non-migrating comprising	See page 26, line 22 to page 27, line 1.
at least one liquid continuous fatty phase,	See page 1, lines 20-23.
structured with a sufficient amount of at least one polymer of formula (I) and mixtures thereof: $R^1-O-\left[\begin{array}{c} \text{C} \\ \parallel \\ \text{O} \end{array} -R^2-\text{C} \begin{array}{c} \parallel \\ \text{O} \end{array} -\text{N} \begin{array}{c} \text{R}^4 \\ \end{array} -\text{R}^3-\text{N} \begin{array}{c} \text{R}^4 \\ \end{array} -\text{C} \begin{array}{c} \parallel \\ \text{O} \end{array} -R^2-\text{C} \begin{array}{c} \parallel \\ \text{O} \end{array} -O-R^1 \right]_n$ in which: - n is an integer which represents the number of amide units such that the number of ester groups present in said at least one structuring polymer ranges from 10% to 50% of the total number of all said ester groups and all said amide groups comprised in said at least one structuring polymer; - R ¹ , which are identical or different, are	See page 11, line 2 to page 12, line 8.

<p>each chosen from alkyl groups comprising at least 4 carbon atoms and alkenyl groups comprising at least 4 carbon atoms;</p> <p>- R^2, which are identical or different, are each chosen from C_4 to C_{42} hydrocarbon-based groups with the proviso that at least 50% of R^2 are chosen from C_{30} to C_{42} hydrocarbon-based groups;</p> <p>- R^3, which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms with the proviso that R^3 comprises at least 2 carbon atoms; and</p> <p>- R^4, which are identical or different, are each chosen from hydrogen atoms, C_1 to C_{10} alkyl groups and a direct bond to group chosen from R^3 and another R^4 such that when said at least one group is chosen from another R^4, the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined in part by R^4-N-R^3, with the proviso that at least 50% of all R^4 are chosen from hydrogen atoms;</p>	
<p>wherein said structured composition is in the form of a non-migrating, wax-free solid, and</p>	<p>See page 2, line 21 to page 3, line 2, stating that the composition may be non-migrating. See also page 6, line 5, stating that the composition may be "in the form of a wax-free solid."</p>
<p>wherein said at least one continuous liquid fatty phase and said at least one polymer form a physiologically acceptable medium.</p>	<p>See page 6, lines 5-7.</p>
<p>A process of structuring a cosmetic composition in the form of a physiologically acceptable composition</p>	<p>See page 26, lines 21-22.</p>
<p>wherein said composition is wax-free and non-migrating.</p>	<p>See page 27, line 10-11</p>

The Title, Abstract and specification have been amended to describe the presently claimed invention more accurately. Support for the new Title and Abstract can

be found throughout the application as originally filed. The amendments to the specification correct obvious clerical errors that would have been recognized by one of ordinary skill in the art, along with the appropriate correction. M.P.E.P. § 2163.07 II. Accordingly, no new matter has been added.

II. Interview

Applicants would like to thank the Examiner for the courtesies extended to their representatives, Thalia Warnement and Michelle O'Brien, at the February 10, 2004, personal interview.

During the interview, Applicant's representatives brought to the Examiner's attention: (1) a document disclosing sample formulations from Bush Boake Allen; (2) U.S. Patent No. 6,497,861 to Wang et al., discussed *infra* in Section V; and (3) U.S. Patent No. 5,998,570 to Pavlin et al., all of which are reflected on the Interview Summary, as well as (4) the box, including the ingredient listing, of Origin's Full Story® Lush-lash mascara; (5) Origin's webpage advertisement for the Full Story® Lush-lash mascara product, available at www.origins.com; (6) the box, including the ingredient listing, of Estée Lauder's MagnaScopic® Mascara Volume Intense mascara; and (7) Estée Lauder's webpage advertisement for the MagnaScopic® Mascara Volume Intense mascara product, available at www.esteelauder.com. To the best of Applicant's representatives' knowledge, these two products ((4) and (6)), were launched in 2003 and thus, do not constitute prior art.

III. Information Disclosure Statement

In the Information Disclosure Statement Applicants filed June 23, 2003, the Examiner has drawn a line through the related co-pending U.S. application and PCT application information, indicating beside the first entry of each that the information has been "considered, not cited." Applicants presume that all of the U.S. application and PCT application information provided on the PTO Form 1449 has been considered by the Examiner, and not just the first entry. If this is not the case, Applicants respectfully request clarification on the record and consideration of the application information.

Furthermore, Applicants note that the Examiner has drawn a line through five cited U.S. Patent Application Publications. Applicants therefore have resubmitted these documents on the Information Disclosure Statement and PTO Form 1449 filed herewith and respectfully request consideration by the Examiner or an explanation on the record for why the Examiner has not considered the U.S. Patent Application Publications.

IV. Provisional Obviousness-Type Double Patenting Rejection

Claims 1-188 have been provisionally rejected for obviousness-type double patenting over claims 1-45, 47-67, 69-113, and 118-167 of copending Application Serial No. 09/618,066 in view of U.S. Patent No. 4,952,245 to Iwano et al. Applicants filed a Terminal Disclaimer over any patent to grant from Application No. 09/618,066, thereby mooting any obviousness-type double patenting rejection as it may apply to claims 1, 47-49, 150, and 154-156, as amended. Attached herewith as Exhibit 1 is a copy of the October 15, 2002, Terminal Disclaimer, along with the date-stamped receipt postcard.

V. Obviousness-Type Double Patenting Rejection

Claims 1-188 have been rejected under obviousness-type double patenting over claims 1-75 of U.S. Patent No. 6,402,408 to Ferrari ("Ferrari"). Applicants disagree that claims 1, 47-49, 150, and 154-156 present any issue with respect to obviousness-type double patenting over claims 1-75 of Ferrari '408. However, solely in an effort to expedite prosecution, Applicants file herewith a Terminal Disclaimer over Ferrari '408, thus mooting the rejection.

VI. Rejections Under 35 U.S.C. § 103

Claims 1-188 have been rejected under 35 U.S.C. § 103(a) as obvious over U.S. Patent No. 5,998,570 to Pavlin ("Pavlin '570") in view of U.S. Patent No. 4,952,245 to Iwano et al. ("Iwano"). According to the Office, Pavlin '570 teaches "a low molecular weight, resin composition and methods for preparing the resin composition, which comprises ester-terminated polyamides of polymerized fatty acids" Office Action at 6-7. The Office states, however, that "Pavlin does not teach a dyestuff in the resin composition." Office Action at 7. Thus the Office relies on Iwano, alleging that Iwano teaches "a cosmetic composition comprising a nacreous pigment containing a dye" *Id.* at 7.

Therefore, the Office concludes that one of ordinary skill in the art would have found it obvious to combine the teachings of Iwano with Pavlin '570 because both teach cosmetic compositions and "[t]he expected result would be a cosmetic composition comprising dyestuffs, nacles and pigments that yield excellent color characteristics, such as luster, [and] brightness along with excellent stability." *Id.* at 8. As claims 1, 47-

49, 150, and 154-156, as amended, do not require the presence of at least one dyestuff, the Office's rejection with respect to Iwano is moot. In the interest of being fully responsive, however, Applicants address the rejection with respect to Pavlin '570.

In order to establish a *prima facie* case of obviousness, the Office must demonstrate, among other things, that the references teach or suggest each and every element of the claims. M.P.E.P. § 2143. This the Office has not done with respect to the present claims. Pavlin '570, for example, does not teach or suggest a cosmetic composition that is non-migratory. In fact, Pavlin never exemplifies any cosmetic composition, as the only product composition exemplified in Pavlin '570 is a clear candle. See Pavlin '570, Example 25. Therefore, Applicants respectfully request reconsideration of the rejection of pending claims 1, 47-49, 150, and 154-156, as amended.

VII. U.S. Patent No. 6,497,861 to Wang et al.

As discussed in the February 10, 2004, personal interview and as referenced in the Information Disclosure Statement filed June 23, 2003, Applicants are aware of U.S. Patent No. 6,497,861 to Wang et al. ("Wang"), filed June 21, 2001. However, Applicants do not believe that this patent is prior art with respect to the present application. In this regard, Applicants point out that the instant application was filed on October 11, 2000. This antedates Wang.

Nor do Applicants believe that the claims presented herein define the same patentable invention as any of those of Wang. Hence, Applicants do not believe that there is any interfering subject matter between the present claims and those of Wang.

VIII. Commonly Assigned Applications

Applicants have identified the related copending applications and patents below in Table 2 that were filed prior to October 11, 2000. Applicants do not believe that any of the identified copending U.S. Patent Applications or any relevant publications thereof or relevant PCT publications of a counterpart thereof, describes or suggests the subject matter of claims 1, 47-49, 150, and 154-156 of the present application under 35 U.S.C. § 102(e) and/or § 103.

Also listed in Table 2, below, is the publication information (U.S. Published Applications and/or U.S. Patents), if any, that correspond to these copending applications and their dates of publication. Moreover, Applicants have provided for the Examiner's convenience the available assignment information in Table 2 or confirmed the obligation of assignment with the assignee, demonstrating that none of these applications, patents, or publications is available as § 102(e)/§ 103 prior art against claims 1, 47-49, 150, and 154-156. See 35 U.S.C. § 103(c). Applicants assert that any of the applications listed below that were filed on or before the instant application's priority date were commonly owned by the Assignee at the time the instant invention was made, which instant invention was also subject to assignment to the Assignee.

For the Office's convenience, Applicants identify in Table 2 below 36 related copending applications, including the instant application, as well as those listed on the PTO Forms 1449 filed on March 20, 2002, October 18, 2002, November 14, 2002, February 19, 2003, and July 3, 2003, or filed herewith, including filing date, assignment, and inventor information. This should assist the Office in assessing any possible issues

of statutory double patenting. This information will also allow the Office to address any issues of obviousness-type double patenting not discussed above. Applicants do not believe that any issue with respect to statutory double patenting under 35 U.S.C. § 101 is present with respect to claims 1, 47-49, 150, and 154-156 of the instant application and the claims of any other copending application or patent listed in Table 2. To be sure, however, Applicants provide Exhibit 2, which contains all of the claims of the 36 pending applications, including the instant claims. As the Office can see, Exhibit 2 contains no claims which are identical to the instant claims.
